Product Requirements Document

Moso Tea — Tea Experience Website

Version 1.0 | Confidential | For Client Approval

1. Document Information

Field	Detail
Project Name	Moso Tea Website
Client	Moso Tea
Domain	mosotea.co.nz
Document Version	1.0
Status	Draft — Pending Client Approval
Prepared By	Development Team
Languages	English + Chinese (Traditional)

2. Project Overview

2.1 Business Background

Moso Tea is a New Zealand-based artisan tea experience studio operating as a home workshop. The business offers immersive, hands-on tea culture experiences including guided tea ceremony sessions, tea tree exploration, and tea tasting for individuals, couples, and small groups.

The business currently relies on word-of-mouth and informal bookings. A professional website is required to establish an online presence, attract both local New Zealand customers and Chinese-speaking visitors, and streamline the booking process.

2.2 Project Goals

- Establish a professional online presence for Moso Tea
- Clearly communicate the unique tea experience offering to potential customers
- Enable customers to browse available sessions and submit booking requests online
- Support both English and Chinese (Traditional) audiences
- Provide the business owner with a simple admin interface to manage bookings

2.3 Target Audience

Audience	Description
Local New Zealanders	Kiwis curious about tea culture and unique local experiences
Chinese-speaking visitors	Chinese tourists and residents seeking authentic tea culture
Corporate groups	Companies looking for unique team-building or client entertainment experiences
Gift purchasers	People looking for a unique gift experience for friends or family

3. Project Scope

3.1 In Scope

- Public-facing website with information display pages
- Online booking request form with time slot selection
- Bilingual support: English and Chinese (Traditional)
- Automated confirmation emails to customers and business owner
- Admin dashboard for the business owner to manage bookings
- Mobile-responsive design
- Basic SEO optimisation

3.2 Out of Scope

- Online payment processing (not required at this stage)
- E-commerce / product store
- Social media integration or feed embedding
- Blog or content management system
- Customer accounts or login

4. Website Pages & Content

4.1 Page Overview

Page	URL	Purpose
Home	/	Hero introduction, key selling points, call-to-action to book
About Us	/about	Story of Moso Tea, philosophy, the host/team
Experiences	/experiences	Detailed descriptions of each tea experience

Page	URL	Purpose
		offering
Booking	/booking	Time slot selection and booking request form
Contact	/contact	Contact details, location, enquiry form
Admin Dashboard	/admin	Private page for business owner to manage bookings

4.2 Home Page

Content Requirements

- Full-width hero section with high-quality tea imagery and tagline
- Brief introduction to Moso Tea (2–3 sentences)
- 3 key highlights (e.g. Authentic Experience, Small Groups, Wellington-based)
- Featured experience cards linking to the Experiences page
- Customer testimonials section (minimum 3 quotes)
- Clear call-to-action button: 'Book an Experience' / '立即预约'

4.3 About Us Page

Content Requirements

- Story of how Moso Tea was founded
- Philosophy and values around tea culture
- Host introduction with photo
- Photos of the tea space and garden

4.4 Experiences Page

Content Requirements

- List of available experience types (e.g. Tea Ceremony, Tea Garden Tour, Tasting Session)
- For each experience: title, description, duration, group size, price
- Photos for each experience
- 'Book Now' button on each experience card

4.5 Booking Page

Booking Flow

1. Customer selects an experience type
2. Customer selects an available date and time slot

3. Customer fills in personal details (name, email, phone, number of guests, special requests)
4. Customer submits booking request
5. System sends confirmation email to customer
6. System sends notification email to business owner

Form Fields

Field	Type	Required
Experience Type	Dropdown (pre-selected if coming from Experiences page)	Yes
Preferred Date	Date picker	Yes
Preferred Time Slot	Time slot selector (shows available slots only)	Yes
Full Name	Text input	Yes
Email Address	Email input	Yes
Phone Number	Text input	Yes
Number of Guests	Number input (min 1, max defined per experience)	Yes
Special Requests	Textarea	No
Preferred Language	Toggle: English / 中文	No

4.6 Admin Dashboard

Features

- Secure login (email + password via Supabase Auth)
- View all booking requests in a list (date, name, experience, status)
- View booking detail (all submitted form fields)
- Confirm or cancel a booking (triggers email notification to customer)
- Manage available time slots (add, remove, enable/disable slots)

4.7 Customer Self-Cancellation

Customers can cancel their own booking via a unique cancellation link included in all confirmation emails. No login is required.

Cancellation Flow

7. Customer clicks the cancellation link in their confirmation email
8. System validates the cancellation token (checks it is valid and not expired)

9. Customer is shown a cancellation confirmation page with booking details
10. Customer clicks 'Confirm Cancellation' to proceed
11. System marks the booking as cancelled and releases the time slot
12. System sends cancellation confirmation email to customer
13. System sends cancellation notice email to business owner

Cancellation Rules

Rule	Detail
Cancellation Deadline	Customers may only cancel more than 24 hours before the booking time
Late Cancellation	If within 24 hours, the link shows an error and directs customer to contact the business directly
Token Expiry	Cancellation token expires after the booking date/time has passed
One-time Use	Each cancellation link can only be used once
Time Slot Release	Cancelled time slots are immediately made available for new bookings

5. Bilingual Requirements

The website must support both English and Chinese (Traditional). The language can be toggled by the user via a language switcher in the navigation bar.

Requirement	Detail
Default Language	English
Secondary Language	Chinese (Traditional)
Language Toggle	Visible in navigation bar on all pages
Scope of Translation	All public-facing page content, form labels, confirmation emails
Admin Dashboard	English only
URL Structure	Single URL with language state stored client-side (e.g. ?lang=zh-TW)

6. Email Notifications

Email	Recipient	Trigger	Content
Booking Confirmation	Customer	On successful booking submission	Booking details, date/time, experience, cancellation link, what to expect, contact info
Booking Notification	Business Owner	On successful booking submission	Customer details, experience, date/time, number of guests, special requests
Booking Confirmed	Customer	When owner confirms booking in admin	Confirmation message, booking details, cancellation link, directions to venue
Booking Cancelled by Owner	Customer	When owner cancels booking in admin	Cancellation notice and invitation to rebook
Booking Cancelled by Customer	Customer	When customer clicks cancellation link	Cancellation confirmation and invitation to rebook
Cancellation Notice	Business Owner	When customer self-cancels via link	Customer name, experience, date/time that was cancelled

7. Non-Functional Requirements

7.1 Performance

- Lighthouse Performance score: 90 or above
- Page load time under 3 seconds on a standard 4G connection
- Images must be optimised using Next.js Image component

7.2 Responsive Design

- Website must be fully functional on mobile, tablet, and desktop
- Mobile-first design approach
- Minimum tested screen widths: 375px (mobile), 768px (tablet), 1280px (desktop)

7.3 SEO

- Each page must have a unique title tag and meta description in both English and Chinese
- Sitemap.xml generated and submitted to Google Search Console
- Structured data (LocalBusiness schema) implemented
- Google Business Profile linked to website

7.4 Security & Compliance

- HTTPS enforced via SSL certificate (Vercel managed)
- Privacy Policy page required (NZ Privacy Act 2020 compliance)
- Admin dashboard protected by authentication — not publicly accessible
- Environment variables used for all API keys — never exposed client-side

7.5 Browser Support

- Chrome (latest 2 versions)
- Safari (latest 2 versions)
- Firefox (latest 2 versions)
- Mobile Safari (iOS 15+)
- Chrome for Android (latest)

8. Design Guidelines

Element	Guideline
Overall Style	Minimal, natural, East Asian-inspired aesthetic
Colour Palette	Warm earth tones — tea brown, cream, bamboo green, off-white
Typography	Clean, elegant sans-serif; consider pairing with a serif for headings
Imagery	High-quality photography of tea, hands, nature, the tea space
Whitespace	Generous use of whitespace — avoid cluttered layouts
Icons	Minimal line icons where needed

9. Technical Stack

Layer	Technology
Framework	Next.js 14+ (App Router) with TypeScript
Styling	Tailwind CSS
Database	Supabase (PostgreSQL)
Authentication	Supabase Auth (admin only)
Email	Resend
Deployment	Vercel
Domain & CDN	Cloudflare (mosotea.co.nz)
Version Control	GitHub

10. Acceptance Criteria

The following conditions must be met before the project is considered complete and delivery is accepted:

- All pages are live on mosotea.co.nz with valid HTTPS
- Website displays correctly on mobile, tablet, and desktop
- Language toggle switches all visible content between English and Chinese
- A customer can complete a booking request end-to-end without errors
- Booking confirmation email is received by the customer within 2 minutes of submission
- Business owner receives booking notification email
- Admin can log in, view bookings, and confirm or cancel a booking
- Lighthouse scores 90+ for Performance, Accessibility, Best Practices, and SEO
- Privacy Policy page is present and accessible from the footer
- Client has reviewed the website and signed the delivery acceptance form

11. Client Sign-Off

By signing below, the client confirms they have reviewed this Product Requirements Document and agree that it accurately reflects the agreed scope of work. Development will proceed based on this document.
